The defensive end's primary role in the 4 3 defense is to get to the quarterback and create pressure. The 4 3 DEs are the smallest of all of the defensive lineman due to their emphasis of speed over strength. They still need to be strong enough to fight their way past offensive tackles, yet quick enough to pursue the running backs on runs to the outside.

The west African country has quincy enunwa jersey been battling a jihadi insurgency for several years, with Islamist fighters roaming the north and centre of Mali. In November 2015, gunmen took guests and staff hostage at the luxury Radisson Blu hotel in Bamako in a siege that left at least 20 people dead, including 14 foreigners. Responsibility for that attack was claimed by Al Qaida in the Islamic Maghreb (AQIM)..

The Philippine Institute of Volcanology and Seismology (Phivolcs) warned late on Sunday that a "hazardous eruption" of Mount Mayon was possible within weeks or even days. The 2,460 metre (8,070 ft) volcano is located in Albay province in the north eastern Philippines.Renato Solidum, from the institute, said three steam explosions by the volcano since Saturday have spewed ash into nearby villages and may have breached solidified lava at the crater and caused lava to start to flow out.Disaster response officials said nearly 1,000 families had been moved to emergency shelters.Two similar "phreatic" eruptions occurred at the volcano in central Albay province on Sunday, unleashing more ash."Mayon's summit crater is now exhibiting bright crater glow that signifies the growth of a new lava dome and beginnings of lava flow towards the southern slopes," the Philippine Institute of Volcanology and Seismology (Phivolcs) said.Solidum jordan leggett jersey said the volcano appeared due charone peake jersey for another major eruption as it has been displaying abnormal behaviour since late last year."Alert level 3 is what we considered critical, 4 is when eruption is imminent, and 5 is eruption in progress," Cedric Daep, the head of the Albay Provincial Disaster Risk Reduction and Management Office, said in a radio interview.Mayon's most destructive eruption was in February 1814,

when lava buried a town and killed myles white jersey 1,200 people. It last erupted in 2014, spewing lava and forcing thousands of people to evacuate.The latest eruptions began on Saturday, unleashing ash, rocks and sulphur fumes and accompanied by rumbling sounds.Phivolcs had earlier raised the alert to level 2, saying the activity was "probably of magmatic origin, which could lead to more phreatic eruptions or eventually to hazardous magmatic eruptions."Since Saturday's first eruption, Phivolcs said it had recorded 158 lawrence thomas jersey rockfall events and urged people to stay away from a 6km (3.7 mile) radius permanent danger one and a 7km Expanded Danger Zone on the volcano's southern flank.Landslides and sudden explosions or a dome collapse that may generate hazardous volcanic flows are also possible, it said.People within the slope of the volcano, but outside the danger zones, were told to take precautionary measures against possible roof collapses due to accumulated ash and rainwater, and "lahar", an Indonesian term for a volcanic mudflow.
